Type:StoryStatus:TO DO (View workflow)Priority:↑ HighestResolution:UnresolvedLabels:None

Description

Requirement specifies that the account enrollment UI displays the available enrollment dates per LDC account for the user to select. An api method GetAcctAvailEnrollDates need to be created in the Enrollment controller to return set of available enrollment dates.

UsgAcctAvailEnrollDates GetAcctAvailEnrollDates(long contractId, List<int> ldcAcctIds) public class UsgAcctAvailEnrollDates { public DateTime earliestOffCycleDate public List<UsgAvailAcctDate> acctAvailDates } public class UsgAcctAvailDates { public int ldcAcctId, public List<UsgReadCycleDate> availDates public bool allowOffCycle } public class UsgReadCycleDate { public DateTime cycleMonth, public DateTime readDate } Method shall check the ldc lead days rules to determine the earliest enrollment date from current time for off cycle enrollment and set the value into earliestOffCycleDate. For each passed ldcAccountId, set the allowOffCycle from ldc rules (IDR, rate class, etc), determines the next available enrollment date from the lead day rules, return the list of cycleMonth and readDate all the way to a month before the end of the contract.
